

NEWS FLASH

DIDSON & LINKQUEST

May I take a minute of your time to introduce a new product that may be of interest to you.

Drilling Rigs requiring Subsea visual & mechanical intervention, utilize Divers, ROV's & Wellhead TV Systems.

All of these, especially Wellhead TV Systems suffer operational limitation in poor visibility caused by turbid (& dark) water.

Our latest product which will overcome this problem is the **DIDSON Acoustic Camera**. Basically a very High Resolution Sonar it offers similar to SIT video real time viewing in any water conditions, irregardless of water conditions.

Please view the Website at www.soundmetrics.com for some outstanding examples.

The **DIDSON Sonar** can be Diver Held, ROV Mounted or easily interfaced to an existing Wellhead TV System.

Advanced Marine offers the DIDSON Sonar on long or short term Rental, or Sale subject to USA approved enduser certificate.

DIDSON™
Dual-frequency IDentification SONar
Using sound to make sound measurements

For your reference, Advanced Marine also represents **LinkQuest**, manufacturer of High Accuracy cost effective Acoustics including

- USBL Positioning & Tracking
- SBL & LBL Systems
- Spool Piece Measurement
- High Speed Modems
- Riser Angle Monitoring Systems
